## EDUCATION

---

### University of Toronto

Sep 2020 - Dec 2024

Honours Bachelors of Science - Computer Science, Minor in Economics, GPA: 3.77/4.0

*Affiliations: Computer and Mathematical Sciences Teaching Assistant, Management Teaching Assistant, Dean's List*

*Courses: Design and Analysis of Data Structures, Algorithm Design and Analysis, Computability and Computational Complexity, Software Tools and Systems Programming, Operating Systems, Introduction to Machine Learning and Data Mining, Artificial Intelligence*

## SKILLS SUMMARY

---

- **Languages:** Python, JavaScript, TypeScript, C, C#, Java, PHP, HTML, CSS, SQL
- **Frameworks:** Express, Django, Spring Boot, .NET, React, MAMP, Bootstrap, Material UI
- **Tools:** Git, PostgreSQL, MySQL, SQLite, MongoDB, Neo4j, Docker, Postman, Heroku, Figma, Jira, Confluence
- **Soft Skills:** Time Management, Organization, Communication, Independent Learning, Teamwork

## EXPERIENCE

---

### Guidewire Software | *Developer Consultant*

May 2024 - Aug 2024

- Architected and presented enhancement to vulnerability detection system used in cloud transition projects to stakeholders
- Developed **automation tool** using **Java** to repair **12 vulnerabilities** in client applications, **saving days** of manual effort
- Built **CLI application** using Python to transition property files to XML configuration files, **saving 30+ consultants hours**

### African Impact Initiative | *Software Engineer*

Jun 2023 - May 2024

- Engineered **Django** email service capable of delivering **HTML-formatted** emails across **10** distinct business cases
- Implemented **routing layer** for **React Redux** app to auto-toggle between **4** user **access levels** and improve security
- Utilized **TypeScript** generics and **Axios** to develop customizable REST API client and integrate with **3** external APIs
- Leveraged GitHub Hooks, GitHub Pipelines, and ESLint resulting in a **50% increase** in development standards compliance

### EcoOnline Global | *Software Developer*

Sep 2023 - Dec 2023

- Created **Datadog** pipeline to parse and correctly classify application logs across **5** unique statuses for **traceability** purposes
- Authored **telemetry library** using **Prometheus**, **C#**, and **.NET**, providing application monitoring across **5+** microservices
- Orchestrated load test using **Docker** and **Grafana k6** simulating **20,000 users** and **150,000 requests** via **Kafka** and **REST**

### OMERS | *Backend Developer*

Jan 2023 - Apr 2023

- Worked in **agile** setting to build microservices using **Java**, **Spring Boot**, **Google Cloud Platform**, and **Apache Camel**
- Automated management of **semantic versioning** using **GitLab Pipelines** when publishing JARs to **Maven repositories**
- Reduced regression tests run time by **70%** by creating **in-memory caching system** using **aspect-oriented programming**
- Enhanced **validation framework** using **Spring Constraint Validator** to reduce complexity of managing payload validations

### University of Toronto T-CAIREM | *Full Stack Developer*

May 2022 - Jan 2023

- Designed **PostgreSQL database schema** defining relations between users, resource entities, ratings, and favourites
- Collaborated with **8** stakeholders to define requirements and deliver **Django** and **React Redux** single-page application
- Engineered **CMS** equipped with **analytic dashboard** to centralize resource approval and track **7** metrics for data analysis
- Integrated client-side **Google OAuth2 authentication** using **Python**, and **Axios**, allowing for passwordless authentication

### Royal Bank of Canada | *Cyber Security Analyst*

Jan 2022 - Apr 2022

- Constructed **X.509 certificate parser** using **Python** allowing users to upload and download certificates in **Django** app
- Filtered **Microsoft SQL** database by developing **search API** using **Django** to execute advanced queries across **10+** fields
- Decreased application access time for **25+** employees by implementing **LDAP authentication** integrated with **Azure AD**
- Streamlined cryptographic key creation on Mainframe using **hashing algorithms** and **Rexx**, cutting generation time by **50%**

### Microsoft | *Product Marketing Intern*

Jul 2019 - Aug 2019

- Launched **internal inventory tracker** that smoothened inventory management for over **2000 employees** using **Microsoft Power Platform**, later presented at the Microsoft Canada Annual General Meeting
